

The All-In-One Maintenance Management Solution

MaintiMizer BlackBox² - Your All-In-One Maintenance Management Solution

At Ashcom Technologies, we understand that an effective maintenance management plan is essential to the success of your business. Why? Whatever sector you are in, whether you are an SME or a multi-national operation, maintenance inefficiency hurts your bottom line, fact! We also believe tools like maintenance management software, designed to allow you to take back control of your maintenance function should not be limited to the few, but readily available to the many. That's why we've developed MaintiMizer BlackBox².

Simplify, Organize and Automate

We know that a lot of companies don't have the time, confidence or the skills to install, configure, and maintain a complex maintenance management system. We understand budgetary constraints may also apply, meaning the technology you need to move your business forward remains inaccessible. But no more, let me introduce you to BlackBox²

A truly unique solution, BlackBox² is an all-in-one, plug n' play, maintenance management device. It incorporates all the functionality and maintenance intelligence you would expect from MaintiMizer, in one self-contained unit. Plug it in, turn it on, and start to simplify, organize and automate your maintenance operation.

So, what's in the box?

*BlackBox²
has helped the department grow
and modernise. We're more
transparent, more efficient and our
workload capacity has increased.*

Chris Hall - Maintenance Manager
Fives Cinetic

A complete maintenance management solution that's what! BlackBox² comes with MaintiMizer pre-installed and all the required supporting software pre-configured – just plug it in and away you go, no IT team required!

MaintiMizer BlackBox² is so easy to set up. Not only does the hardware fit your needs, but the software does too. If there is something you wish to change you can. Need a custom report? You can build it. Want to change what you see and how you see it, you can. You can also upload documents, photographs and more.

If that's not easy enough, the Ashcom Technologies Professional Services Team will be on hand to assist your MaintiMizer BlackBox² setup process and help you maximise your return on investment.

BlackBox² - Works out of the box

Blackbox² will transform your maintenance activity, allowing you to take control of your equipment, your spares and of course your costs. It not only supports, but optimizes your existing operation, allowing you to work smarter.

Out of the box it includes six, easy-to-use, modules essential to the efficient completion of your maintenance management activities.

Work Order

Supports both proactive and reactive work order entry. Allows you to track maintenance tasks, allocate labour and manage inventory usage.

Planned Maintenance & Equipment

Catalogue your assets, create preventative maintenance schedules and understand the maintenance costs for all of your assets.

Timecard

Schedule your most important asset, your time. Track and report maintenance labour hours, how they are spent and the associated costs.

Inventory

Provides quick and accurate information regarding critical spares. Including the quantity in stock, availability and storage location.

Vendor & Purchase Order

Store supplier contact information; Request and Order spares; Receive them into stock and track them throughout your organisation.

Utility

Your utility function is your new best friend. It will help you configure and customise MaintiMizer™ so it better supports your maintenance operation.

BlackBox² - Transforms Maintenance Management

BlackBox² will promote best practice and best performance. By taking responsibility for the critical and repetitive aspects of your maintenance program it will transform your maintenance department.

Drives Cost Reductions

BlackBox² is proven to help reduce unplanned downtime, it will improve your average time to repair, reduce your average cost of repair and your stockholding; As well as reducing the need for overtime. MaintiMizer also supports a structured preventive maintenance schedule which is proven to increase the life of expensive machinery.

Improves Workflow

BlackBox² automates repetitive tasks, speeds-up communication across your business and increases understanding by making data more accessible. BlackBox² achieves this by helping you implement and manage an effective preventive maintenance strategy. This improves response times to breakdowns, eliminates unnecessary paperwork and ensures a cleaner, safer, more regulatory compliant environment.

Stress-Free Management

Managing a maintenance operation is challenging. BlackBox² helps you get to grips with yours. It eliminates the need for time consuming spreadsheets and paperwork and other common headaches. It will help manage your spares, avoid outages of critical items, track maintenance upgrades and your work history.

Intuitive Tracking & Reporting

It always seems like your workflows can be improved – with BlackBox² you'll finally be able to tell where and how. By simply using it you will generate data, providing a previously unavailable insight to your business – meaning you achieve better outcomes. Imagine having data like average time to repair, time between failure at your fingertips, with BlackBox² you will.

Ashcom Technologies - Our story

Ashcom Technologies are specialists at implementing maintenance management software solutions. It is what we have done for the last 35 years.

What started with a piece of paper and pencil has evolved into a range of digital solutions, designed to meet the needs of users from a wide variety of markets and from companies of all sizes and cultures. Built by maintenance professionals for maintenance professionals MaintiMizer™ helps you face your daily challenges head on with absolute confidence.

At Ashcom, we are incredibly proud of our track record contributing to the growth and success of our customers by helping them harness the power of technology to drive their business forward. We understand success in a competitive market means being proactive, productive, and working smart in every area of your business - including your maintenance department.
